Jovan Golic

Passionate and results-driven Java Web Developer with a solid foundation in object-oriented programming, backend development, and database management. Skilled in Java, Spring Boot, Hibernate, JPA, and MySQL, with additional experience in Python. I have independently developed and deployed full-stack web applications using industry best practices to create scalable and efficient solutions. Proficient in containerization and deployment with Docker and Docker Compose, including hosting on platforms like Docker Hub and Render. My projects, such as full-stack-hotel and Project-Cinema, demonstrate my ability to integrate backend logic, database structures, and API communication with frontend technologies. Coming from a background in production and sales, I bring strong analytical skills, a problem-solving mindset, and the adaptability that helped me successfully transition into IT. I thrive in collaborative environments and am eager to contribute to real-world software development projects.

Education

- Political science** **Oct 2011 - Oct 2017**
University of Educons, Novi Sad
Field of study Social sciences, Journalism and Information.

Courses

- Python Developer at ITAcademy Belgrade** **Oct 2020**
Python, Object-Oriented-Programming, SQL, Python Net, Pandas, Python Web.

Junior full stack developer for WEB applications development using JAVA platform .
- Python Data Analysis & Visualization Masterclass by Colt Steele** **May 2024**
Pandas, Matplotlib, Seaborn, & More! Analyze Dozens of Datasets & Create Stunning Visualizations

Employment

- Soldier** **2017**
Dept. of Defense Rep. of Serbia, Novi Sad
- Salesman** **2019**
SBB, Novi Sad
Selling internet, TV and mobile phone services to customers
- Production worker** **2020 - 2023**
Div Trades, Backa Palanka
- Storage-employee** **2024 - Apr 2025**
Delhaize Serbia, Novi Sad

Hobbies

- Programming and work on personal projects Monitoring news in the field of technology and web development

Projects

Full-stack Hotel App: tech: Java · Spring Boot · React+Vite · MySQL · Docker. Link: <https://github.com/jovangolic/full-stack-hotel> Dockerized Java full-stack hotel room booking application. Users can search and book rooms, while administrators manage capacity. Implemented user authentication (JWT), role-based access and REST API.

Full-stack Cinema App: tech: Java · Spring Boot · React+Vite · Stripe · MySQL · Docker Link: <https://github.com/jovangolic/full-stack-cinema> Cinema system that allows users to view projections, buy tickets and pay online via Stripe. Administrators can add movies, theaters and screening schedules.

Project-Bank Application for records of user accounts and transactions, with implemented logic for funds transfer and user registration. Tech: Java · Spring Boot · H2 · MySQL. Link: <https://github.com/jovangolic/Project-Bank>

Project Asteroid-Game: A simple browser game inspired by the classic "Asteroids". The player controls a spaceship avoiding and destroying asteroids. Tech: JavaScript · HTML · CSS Link: <https://jovangolic.github.io/AsteroidGame2/>

Project Connect-Four: A web implementation of the popular board game "Connect Four" with support for multiple users. Tech: JavaScript, React · Node.js Link: <https://igra.onrender.com/> *Note: Application may take up to a minute to load on first visit due to Render's free hosting cold start.*

Portfolio-web-site: A personal portfolio site showing my projects, contact details and experience. Tech: JavaScript, React+Vite · GitHub Pages link: <https://jovangolic.github.io/PortfolioSite/>

Project ERP-V1: Independently developed backend ERP system for warehouse management with 4 roles (super-admin, admin, shift leader, warehouseman). Allows creation of invoices in PDF format, inventory records and tracking of goods shipment. Especially adapted to the needs of micro, small and medium enterprises. Tech: Java · Spring Boot · JPA · PDF Export · Security Roles · MySQL Link back: <https://github.com/jovangolic/erp-v1> Link front: <https://github.com/jovangolic/erp-front>

Achievements

Military service Department of Defense, Rep. of Serbia, class 2017, Novi Sad

Availability

I am ready to join the team immediately and am happy to learn through real projects and cooperation with more experienced developers.
