# Jovan Golic

Passionate and results-driven Java Web Developer with a solid foundation in object-oriented programming, backend development, and database management. Skilled in Java, Spring Boot, Hibernate, JPA, and MySQL, with additional experience in Python. I have independently developed full-stack web applications, applying industry best practices to create scalable and efficient solutions. My projects, including a project-hotel and a project-cinema, demonstrate my ability to integrate backend logic, database structures, and API communication with frontend technologies. Coming from a background in production and sales, I bring strong analytical skills, problem-solving ability, and a proactive mindset that have allowed me to transition into IT. I thrive in collaborative environments and am eager to contribute to real-world software development projects while continuously expanding my expertise.
