Jovan Golic

Passionate and results-driven Java Web Developer with a solid foundation in object-oriented programming, backend development, and database management. Skilled in Java, Spring Boot, Hibernate, JPA, and MySQL, with additional experience in Python. I have independently developed and deployed full-stack web applications using industry best practices to create scalable and efficient solutions. Proficient in containerization and deployment with Docker and Docker Compose, including hosting on platforms like Docker Hub and Render. My projects, such as full-stack-hotel and Project-Cinema, demonstrate my ability to integrate backend logic, database structures, and API communication with frontend technologies. Coming from a background in production and sales,I bring strong analytical skills, a problem-solving mindset, and the adaptability that helped me successfully transition into IT. I thrive in collaborative environments and am eager to contribute to real-world software development projects.
